The ROVING Scholar & the LIBRARY

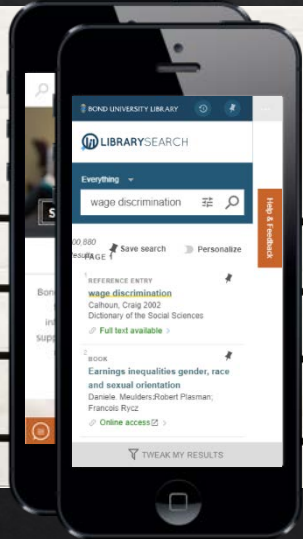

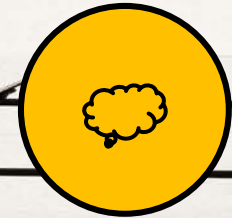

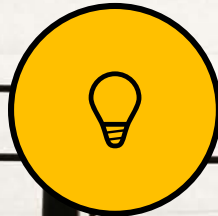

Extending usability testing to mobile devices & asking what students really want on them.

Peta Hopkins & Jessie Donaghey, Bond University

Objectives

Experiences

Expectations

Students anticipate their university experiences will mirror the information accessibility and immediacy of their personal lives – easily accessed, convenient and available anywhere on any device.

Are we measuring up?

Navigating a complex information environment on small screens has extra challenges.

Responsive design on websites will not solve all usability problems for mobile devices.

"I like to centre everything I do around my phone... When I typically think about going .. to the library page I'd think it's too difficult to do it on a phone"
