

Trade, Environment and Sovereignty:

**Developing Coherence between WTO Law, International
Environmental Law and General International Law**

PhD Thesis

Bradly J Condon

Summary

This thesis analyses the consistency of WTO law with international environmental law and general international law in the field of trade and environment. GATT obligations require trade measures to comply with national treatment (Article III) and most-favoured-nation treatment (Article I) and to prohibit import and export restrictions (Article XI). GATT exceptions permit measures to protect human, animal or plant life or health (Article XX(b)) and to conserve exhaustible natural resources (Article XX(g)). This thesis analyses the consistency of unilateral and multilateral environmental measures with these GATT obligations and exceptions. It argues that the Article XX exceptions should be interpreted according to the proximity of interest between the country using trade restrictions and the environmental problem. It argues further that Article XX should be interpreted in accordance with customary international law regarding sovereign equality, non-intervention and the doctrine of necessity. Applying the principle of sovereign equality to WTO rights, this thesis proposes that WTO provisions be designed and interpreted to compensate for the economic inequality of WTO members in order to ensure equal access to WTO rights. Moreover, the principle of non-intervention should be applied in the WTO context to prohibit economic coercion. Unilateral environmental trade restrictions fail both tests. They use economic coercion to intervene in the internal affairs of sovereign States and are available in practice only to countries with significant market power. However, the doctrine of necessity may be invoked to excuse the non-observance of WTO and other international obligations to permit the use of trade restrictions to address urgent environmental problems with which the enacting country has a jurisdictional nexus.

Certificate

This thesis is submitted to Bond University in fulfillment of the requirements for the Degree of Doctor of Philosophy.

This thesis represents my own work and contains no material which has been previously submitted for a degree or diploma at this University or any other institution, except where due acknowledgment is made.

This thesis represents the culmination of several years of research and writing on the topic of trade and environment. Prior to the creation of the World Trade Organization, I wrote a LL M thesis, *Making Environmental Protection Trade Friendly Under the North American Free Trade Agreement* (University of Calgary, 1993). I thank Owen Saunders at the University of Calgary for helping me to get started in this subject. Some of this early analysis of this topic in the NAFTA context has been incorporated into this thesis, with substantial revisions that reflect the developments that have occurred in both jurisprudence and academic debate in the ensuing decade. I have also published the following three journal articles on trade and environment, and thank the editors of these journals for accepting and editing my work:

‘Multilateral Environmental Agreements and the WTO: Is the Sky Really Falling?’ (2002) 9 *Tulsa Journal of International and Comparative Law* 533.

‘Reconciling Trade and Environment: A Legal Analysis of European and North American Approaches’ (2000) 8 *Cardozo Journal of International and Comparative Law* 1.

‘NAFTA and Environment: A Trade-Friendly Approach’ (1994) 14 *Northwestern Journal of International Law and Business* 528.

My thinking on this topic has also benefited from the following conference presentations, for which I thank the conference organizers and participants:

‘NAFTA and the Environment’, *Business Across Borders (Joint Meeting of the Canadian Bar Association/Commonwealth Law Association)*, Vancouver, British Columbia, August 1996.

‘Reconciling Trade and Environment: A Legal Analysis of European and North American Approaches’, *NAFTA-The First Year*, Tilburg University, The Netherlands, May 1995.

‘Conflicts between Trade Liberalisation and Environmental Protection’, *International and Development Economics Seminar*, Tinbergen Institute, Rotterdam, May 1995.

‘NAFTA and Environmental Protection’, *NAFTA: Its Impact on Development, Human Rights and the Environment*, Simon Fraser University, March 1994.

‘NAFTA and Environment: A Trade-Friendly Approach’, *Sustainable Development in the 21st Century Americas: Alternative Visions of Progress*, University of Calgary, Calgary, Canada, March 1994.

‘Trade and Environment in the NAFTA’, *Meeting of the Learned Societies*, Ottawa, Ontario, June 1993.

‘Implementando la Política Ecológica Bajo el Tratado de Libre Comercio: En Busca de Reglamentación Eficaz Que No Restringe el Comercio Continental’, *Mesa Redonda sobre Ambiente y Tratado de Libre Comercio: Acuerdos Complementarios*, Universidad Nacional Autónoma de México, Instituto de Investigaciones Jurídicas, México City, March 1993.

I thank Ross Buckley for being a great thesis advisor, colleague and friend. While hiking together at Burleigh Heads, our conversation about the need to incorporate general international law into the analysis of WTO law helped me to see the big picture that was necessary to conceive the thesis. I especially want to thank Ross for the Gold Coast lunch and fine bottle of Australia Chardonnay that set the tone for this project and made it a thoroughly enjoyable process.

I thank my good friend, Tapen Sinha, who suggested I do a PhD with Ross, offered constant encouragement and lent me his ear when I needed it. I also thank Rebecca Benedict for being a good friend and neighbour and lending me her ear while Tapen was away on sabbatical. I thank Ali DuBose for forgiving my obsession with getting this thesis completed. I thank my boss, Carlos Alcérreca, for allowing the time to do this thesis and encouraging me to get it done.

Last, but not least, I want to thank my family in Canada (Kip, Cathy, Brenda, Wayne, Cecil, Jennifer, Adam, Tionne, and Jayden) and my family in Australia (Barb, Malcolm, Matt, Melinda, and Marie) for their love and support.
